

Dear Friend of Cedar Creek,

We're at a critical moment, and we need your help.

The proposed 13.2-acre private ski lake would pump 35,000,000 to 50,000,000 gallons to fill in the first 9 months. **Then, 50,000-90,000 gallons from Cedar Creek and the Town of Cedar Creek aquifer every single day.**

The City of Cedarburg's own engineer confirmed that during low-flow periods, this extraction will exceed the creek's natural flow rates. **That's more water pumped out than the creek produces.**

Plus, they have NO PERMITS and NO TOWN OR DNR OVERSIGHT, because they have designed this plan to avoid it!

What happens when the creek runs dry? Fish die. Eagles lose their hunting grounds. **Your well could fail and require a new deeper well that will cost up to \$50,000.**

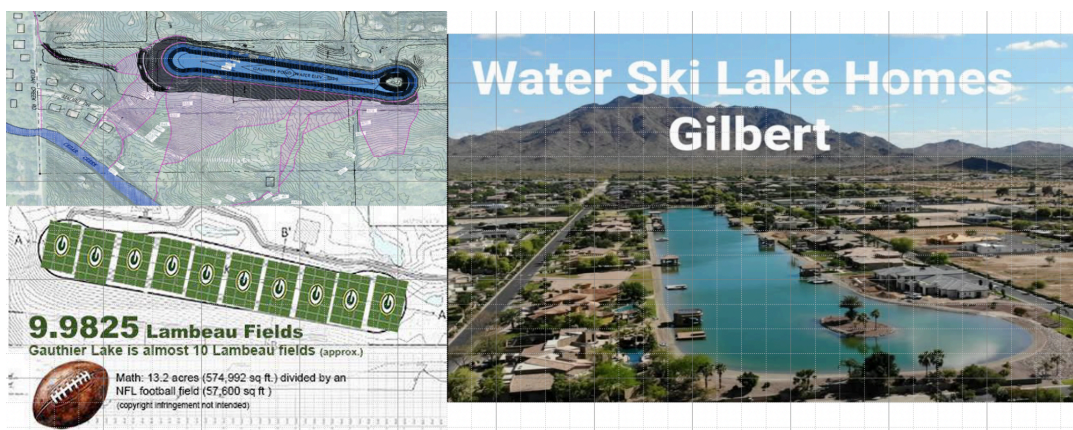

Cedar Creek Park & Covered Bridge Park,, where our families gather for concerts, weddings and festivals could lose the water that makes our parks special.

This project, and projects like it, will impact Cedar Creek, the Milwaukee River and Lake Michigan.

Here is the Gauthier plan on the left. This is the size of almost 10 football fields right next to Covered Bridge Park, the original Covered Bridge Farm, and countless neighbors who live along this 9 parcel area.

On the right is the standard development plan for a ski lake like this. The Gauthiers would not comment on their future development plans at the Town Board Meeting.

But they did say, **they do not plan to live on the property.**

HERE'S THE GOOD NEWS: WE'RE ALREADY WINNING

In just weeks, our grassroots campaign has accomplished what most environmental fights can't:

- ✓ Nearly 1,000,000 people reached through social media and press coverage
- ✓ We have raised public awareness on this project **BEFORE** the town approves this project
- ✓ The Gauthiers have spent 4 years on a plan that requires no permits and zero oversight.
- ✓ Plus there has been no independent ecological or hydrological assessment. So there is no way to tell how this may really affect our water or our ecosystem.
- ✓ Documented three federally protected endangered species on site
- ✓ Secured support from local, state, and federal officials

The support is overwhelming, everyone sees what's at stake.

But no public official in our state controls the Town of Cedarburg Board.

It's up to us.

WHAT YOUR DONATION FUNDS

\$150: Funds 10 yard signs

\$500: Funds 5 Press Releases

\$1,000: Funds one week of advertising on social media to increase public awareness

\$2,000+: Help us secure legal support so we can force a DNR review

\$5,000+ Become part of our legal strategy team. We simply ask for your "financial commitment" of \$5,000 or more. **We will not ask you for any money until our legal steps are clear.** At which point, we will ask members of this team to contribute as we move through 3-4 key legal steps.
